

# Memorandum

*Flex your power!  
Be energy efficient!*

**To:** AREA SENIORS  
SPECIFICATION ENGINEERS  
DISTRICT OFFICE ENGINEERS

**Date:** May 10, 2004

File:

**From:** BRIAN LEE, Chief (Original Signed by Brian Lee)  
Office of Construction Contract Standards  
Division of Engineering Services

**Subject:** Price Quotations (REACTs and QUADGUARD SYSTEM)

Below are the current price quotations for the **REACT** crash cushions manufactured by Energy Absorption Systems, Inc. and distributed by Traffic Control Service, Inc. for use with SSP 83-967. The price quotations are for the 9-cylinder set-ups shown on Standard Plans A82C through A82DB and are effective for projects that begin advertisement during the period from **July 1, 2004 to June 30, 2005**:

Crash Cushion (REACT 9CBB)	<b>\$33,171</b>
----------------------------	-----------------

Crash Cushion (REACT 9SCBS)	<b>\$33,411</b>
-----------------------------	-----------------

The above prices include all necessary hardware for a standard system but do not include sales tax and freight cost. The prices are FOB Pell City, Alabama.

Price quotations for **QUADGUARD SYSTEM** crash cushion vary depending on the number of "bays" in the system, type of backups, and types of transition panels (too many to list). Currently, we do not have an approved SSP or Standard Plan for this type of impact attenuator, but some Districts have been including them in their projects.

The price quotations for the QUADGUARD system were also provided to us by Traffic Control Service, Inc. If you have projects using the QUADGUARD system and need price quotations for use in your specifications, please call the Construction Contract Standards Branch at (916) 227-6374.
